

Alkmaar, 27 October 2017

Dear Customers,

I am writing with an update on the technical status of Gas Storage Bergermeer (GSB).

The additional work on parts of our compressors, as detailed in our previous letters, is now complete.

For one compressor this means the process of getting it back online can start. The updated weekend planning has moved the restart forward by one day, and is now scheduled for Tuesday 31<sup>st</sup> of October at 0600 hrs.

Three other compressors still require technical and safety validations. Once these are in place, they will also be brought back online. As this process needs to be done in sequence, the injection capacity is expected to come back online step-by-step from mid next week.

Technical unavailability will continue to be published under the transparency section of our GSB website.

Customers should request their contractual rights via CDIS messaging.

Best regards,

Tom Eikmans
